

at work^{*} with Camira

Cara

Cara is a dobby weave fabric with excellent acoustic properties. It has the look and feel of wool in a synthetic composition, with select colourways containing 4–20% post-industrial recycled content from Camira's polypropylene production.

It is acoustically transparent, making it ideal as a decorative face textile, together with sound absorbing substrates, on walls and panels.

Use	Panel / Screen
Composition	100% Polypropylene
Width	170cm
Weight	658g per lineal metre
Abrasion	N/A
Light Fastness	6
Finish	Bleach Cleanable
